About Me

>_ Overview

I'm Anas, a Full-Stack Developer working with .NET and Angular, and a Vibe Coder. Alongside development, I design as a UI/UX Designer and Graphic Designer — I love building the idea and designing it in the same moment, not as separate phases. I entered this field out of pure passion, not by accident, and that passion is still the fuel that keeps me learning and experimenting with something new every day. My goal isn't just to have a job — it's to reach a point where my name is associated with genuinely clean, well-crafted work, both in code and in design.

- 🟢 Third Year Software Engineering Student @ Alzaytoonah University
- 🟢 Full-Stack Developer (C#, ASP.NET, Angular)
- 🟢 UI/UX & Graphic Designer
- 🟢 Delivering innovative software solutions for complex problems
